Winona Apartments 26th Ave. and Dewey

A 12% Investment

This is a three-story brick apartment house containing six 7-room apartments, renting for \$55,00 each. Three 6room apartments, renting for \$47.50, and three 5-room apartments, renting for \$42.50 each. A total rental of \$7,200 a year. In addition to this there are janitor's quarters in the basement and a large hall formerly used as a reception hall, which could be divided into another apartment of three or four rooms and bath, which would bring it at least \$25.00 additional per month. The out of town owner has recently given us the exclusive agency for the sale of this property for a few days only at a price far less than the property could be duplicated for. The ground is 128x128, with streets on three sides and private alley on the fourth side. The location is close in, being only one block south of Harney and two blocks from Farnam street. A district in which the lots have more than doubled in value within the last two years. Our price will surprise you, \$45,000. There is a mortgage of \$25,000 now against the property, which can be paid off or assumed. It draws 6%, payable semi-annually. Don't delay-It will be sold this week.

WHEN you buy farm land, get it where it has a future. If you buy high priced land you are just trading deliars, so to speak. We have a land proposition that ought to interest every farmer seeking to better his condition. Our lands sell at £20 to 540 per acre, on easy terms. The sell is rich and fertile, the elimate fine, the water supply pure and plentiful, the rainfail has always been ample to insure crops. Until a few years ago there was no railroad through this section of the country, but with the advent of a main line railroad it is now rapidly coming to the front, towns are springing up, and in a few years these lands will double and treble in value. We have personally investigated this land, bought gome of it ourselves, and have the agency for a limited supply. These lands are located in western Texas, below the Panhandle. Circular giving detailed information furnished upon application.

EDISON'S GREATEST MARVEL

Discovery and Wonderful Development of the Incandescent

Lamp.

MONTHS

Of all the marcels Edward has wrought outting the White title the Great therefore not without reason that the of the wonders of incandescent lighting. For once a year the great army of electrical workers glorify their leader with

Edison day was not a commemoration of the inventor's birth, but of the anniversary of the first successful attempt tober 21, 1979, and the story of the development of the incandescent light after that experimental triumph is fully as wondeful as the experiment was, though but itself was the culmination of lifteen months of continuous toll.

The filament he used then was simply in an oven till all its elements had passed away excepting its carbon frame work, for this was before he had discovered the availability of carbonized bamboo. After his discovery the latter substance was used for about ten years in making \$650 filaments for commercial lamps. This 1914 Oakland touring, elec. equipped 425 was followed by the "squirted" filament employing carbonized cellulose in one

625 form or another. Next came the metalized carbon filament, then the pressed tungsten fila-450 ment and finally the special form of drawn tungsten wire used in modern 350 Edison Mazda lamps. Working down from a consumption of four or five watts of 400 electrical energy per candlepower in Edi-1912 Cadillac touring, blec, equipped 525 son carbon filament lamps to the stand-chemical action and the heat in preparard a few years ago of 3.10 watts per gry candlepower, the Mazda lamp has brought 1933 Overland, tour, elec. equipped and this down in about five years to about one watt; while in the large sizes of 1916 Dodge touring, very fine cond. 550 Mazda gas-filled lamps, the reduction in 140 to \$15 an ounce. Practically the en-1913 Flanders touring, good shape., 250 current consumption has reached the tire world's supply comes from the Ural

650 used, which concentrated his thoughts on day they are the equivalent of real the subject of lighting by electricity, and money. Gold is worth only \$20 an ounce, he determined to tackle the problem. Therefore as much as this traditionally Fdison has said: "In those days it was five times as much as this traditionally and easy to see what electric lighting needed valuable metal. And the platinum does 1912 Chalmers tour, fine condition 300 -it wanted to be subdivided. The lights not glitter, either; in fact, it doesn't even were too bright and too big. What we shine, 155 wanted was little lights and to distribute All over the country dentists, jewelera them to people's houses like gas."

225 faic are and the incandescent, Edison pay the highest cash prices for each. A chose the latter as the practical one for short time ago it was not unusual to acthe subdivision of electric lighting into numerous sets of old false teeth in the little units. The discovery of the proper pawnshops, but no more. They have substance and method for securing the been sold and the pawnbrokers made a incandescence proved the stickler. The tidy profit, for they only paid from 5 almost boundless scope of his investiga- cents to 10 cents a plate for them then, tions, which is so characteristically epi- False teeth are a good investment, and tomized in his remark, "We tried vari- the longer the war lasts the higher platby the patent records.

The substances that were experimented with included electric arc light carbon TALL TALE FROM THE TIMBER (made into paste and rolled into threads). cotton thread, vulcanized fiber, jute, A palm fiber, grasses, carbonized flax, threads made of lamp black and tar, charcoal, hemp, soft paper, fish line, va-Chalmers Roadster.

Contrary to the general belief, the tooth are never used again. nor is the rubber plate in demand, but in scrap of paper which he had baked each tooth is a very rotal amount of platinum that is much in demand just it present. The war, of course, is the

In each false touth of most manufacturers there are two small platinum wire pins, perhaps one-sixteenth of an inch in inch in length. The pins are worth avproximately 2 cents each, or 4 cents for the tooth, and are what the purchasers of old false teeth are after. The older the set of teeth the more valuable they are, for in the good old days the platinum was used more freely than in late years. This metal, containing a 30 per cent fridlum alloy to harden it, is used because of the high resistance it offers to nearly all ing the teeth in the plates.

One year ago today the price of platinum, probably the most valuable metal in the world in general use, was about low level of nearly a half watt per mountains in Russia, and on account of the war this supply has been to all purposes shut off entirely. The other places where the metal is found produce only a Edison practically began his experi- minor amount and are unable to fill the ments in electric lighting in September, market demand.
